

FOR IMMEDIATE RELEASE

Nuance from Specialty Lighting New Distinctive Shades of LED Illumination

North Carolina – Specialty Lighting, a leading source for lighting solutions, introduces **nuance and nuance-dim**. These sleek low-profile luminaires provide ideal solutions for efficiently illuminating cabinets, shelving, displays, and hospitality or work spaces. **Nuance-dim** has a touch control dimmable feature – perfect for spaces requiring a range of bright to subtle shades of lighting.

Both **nuance and nuance-dim** are brilliantly designed LED luminaires constructed of lightweight aluminum housing with acrylic diffuser. Up to six fixtures can be linked when using the available connecting cables. An integral power source means no bulky driver is needed. The 26” fixtures are available in black and white finishes.

Since LEDs are more efficient than traditional lamp sources, **nuance and nuance-dim** consume less energy while providing more effective illumination. Standard features include:

- Electrical rating: 120V, 60Hz
- Lamp source: LED
- Power: Integral driver (nuance-dim is dimmable)

- more -

Page two

- Lumens: See ordering information
- Color temperature: 4000K
- Fixture length: 26"
- Aluminum housing with acrylic diffuser
- Power cord: 5' 18/2 /SPT-2 (included)
