

Request a Custom LED Light Guide Panel Quote

Ready to plan a custom Light Guide Panel? Contact Specialty Lighting with your project details, drawings, dimensions, quantity, and performance goals. Our team can help you select the right panel configuration for your application.

Specialty Lighting can review your application goals, drawings, power needs, mounting conditions, control requirements, and visual expectations to recommend a Light Guide Panel solution that fits your project.

The checklist below outlines the details to discuss when selecting the best light guide panel for your project. New to light guide panels? Not sure what you need or have questions? Ask away.

Light Guide Panel Planning Checklist

- Confirm the panel size, shape, and viewing distance.
- Choose single-color white, tunable white, RGB, or RGBW lighting.
- Identify brightness expectations, diffusion needs, and finished appearance.
- Plan power supply location, access, ventilation, and wire routing.
- Confirm dimming and control compatibility before ordering.
- Provide drawings, sketches, renderings, or installation photos when available.
